Meet the Team

The AIM CCI Approach

AIM CCI *Community Care* Safety Bundles

Data Overview

Resources and Technical Assistance

AIM CCI Expansion Plan

Objectives

1. Provide an overview of the NHSA – HRSA partnership to address maternal morbidity and mortality through the AIM CCI pilot.
2. Describe the AIM CCI approach to reducing disparities in maternal morbidity and mortality.
3. Explain how non-hospital focused maternal safety bundles implemented in the community setting can positively impact maternal outcomes.
4. Review the AIM CCI expansion plan and learn how to become an AIM CCI expansion site.

AIM CCI National Team

Deborah Frazier, NHA CEO
Project Director & Co-PI

Haywood Brown, MD
Co- Principal Investigator

Saanie Sulley, MD, PhD
Data Manager & Analyst

Karen Chustz, MSW
Senior Program Manager

**Ashley Calderone, DNP, RN,
CLC, IBCLC, C-ONQS**
Clinical Implementation Manager

Lidyvez Sawyer, EdD, MPH
Equity Implementation Strategist

Valerie Newsome Garcia, PhD
Community Transformation Strategist

Alicia Aroche, MEd
Communications Director

Amber Wilson, CLC, IBCLC
Program Coordinator

AIM CCI Team: Consultants

Sue Kendig, JD, WHNP-BC
Clinical – Community Integration &
Patient Safety Implementation Strategist

Deidre McDaniel, MSW, LCSW
Clinical-Community Bundle Integration Specialist

Fleda Jackson, PhD
Perinatal Mental Health Expert

Derek M. Griffith, PhD
Co-Founder and Co-Director of the Racial Justice Institute
Founder and Director of the Center for Men's Health Equity
Professor of Health Systems Administration and Oncology
Georgetown University

What is AIM CCI?

The purpose of the AIM – Community Care Initiative is to:

- 1) Support the development and implementation of **non-hospital focused maternal safety bundles** within community-based organizations and outpatient clinical settings across the United States and
- 2) Build upon the foundational work of AIM by addressing preventable maternal mortality and severe maternal morbidity among pregnant and postpartum women outside of hospital and birthing facility settings

One Agreement Awarded

National Healthy Start Association

Five-year Pilot

Pilot Period 2019 - 2024

Why the need for a non-hospital community-based initiative?

Between 2011-2015:

- 31% of deaths occurred during pregnancy
- 36% of deaths occurred at delivery or in the week after
- 33% of deaths occurred 1 week to 1 year postpartum

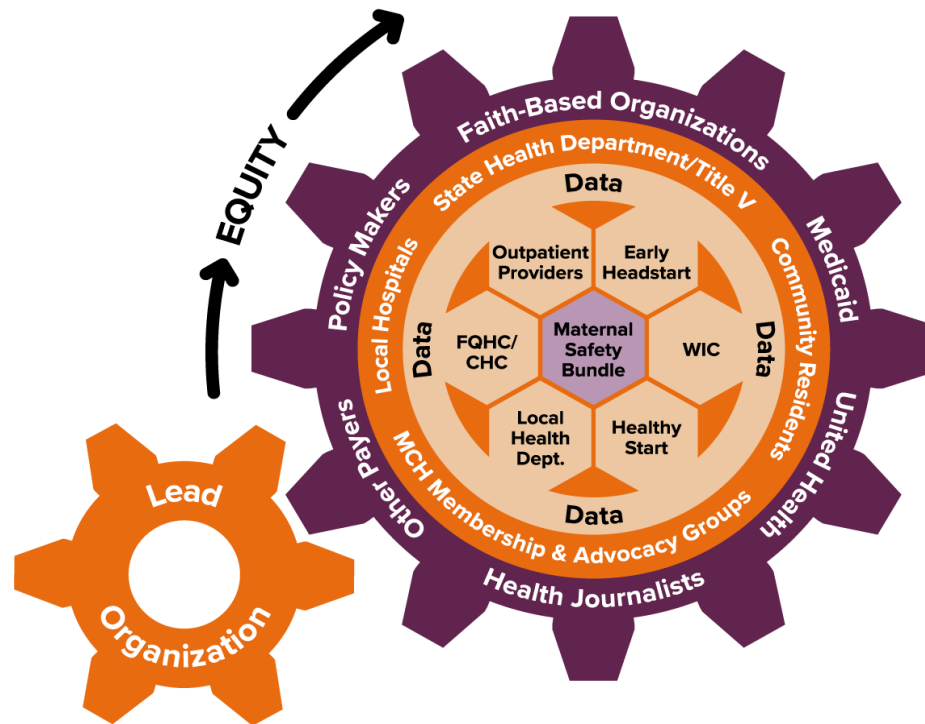

In the United States, over 800 birthing persons die as a result of pregnancy or pregnancy-related complications each year.

AIM CCI Approach

AIM CCI Approach

Who are Local AIM CCI Partners?

Local partners include all community providers or representatives from provider organizations that treat, interact, advocate for, and serve pregnant and postpartum women. To implement AIM CCI at the local level, we recommend a structure that includes an overarching advisory council comprised of partners from groups as noted below, a subset of which will form the implementation team or workgroup.

Implementation: The **IMPLEMENTATION GROUP** meets monthly. This group should be able to implement the bundle elements and collect and share aggregate data relative to AIM CCI performance measures. The model allows you to include local partners that may be exclusive to your community. Who might that be?

Advisory: The **LMSW** meets bi-annually. These are relationships that you may cultivate to garner high-level support, advise on best practices, or otherwise leverage their interest in guiding and supporting the initiative.

Awareness: The **AWARENESS GROUP** are those community partners that you might consider MCH champions that should have **AWARENESS** of the AIM CCI activities in your community. This group may be invited to LMSW meetings or kept abreast via mailing lists and individual meetings as milestones are achieved.

* The agencies/organizations depicted on this image are **EXAMPLES** of partners.

HEALTHY START
ASSOCIATION

Collective Impact Framework

a structured approach to organizing collaboration of organizations from different sectors to address a specific social issue. "Collective Impact is a network of community members, organizations, and institutions who advance equity by learning together, aligning, and integrating their actions to achieve population and systems-level change. This definition identifies **EQUITY** as the North Star for why and how collective impact work takes place, specifically names community members as key actors along with other partners and emphasizes the importance of systems change in this work."¹

FIVE CONDITIONS OF COLLECTIVE IMPACT

1. Common Agenda

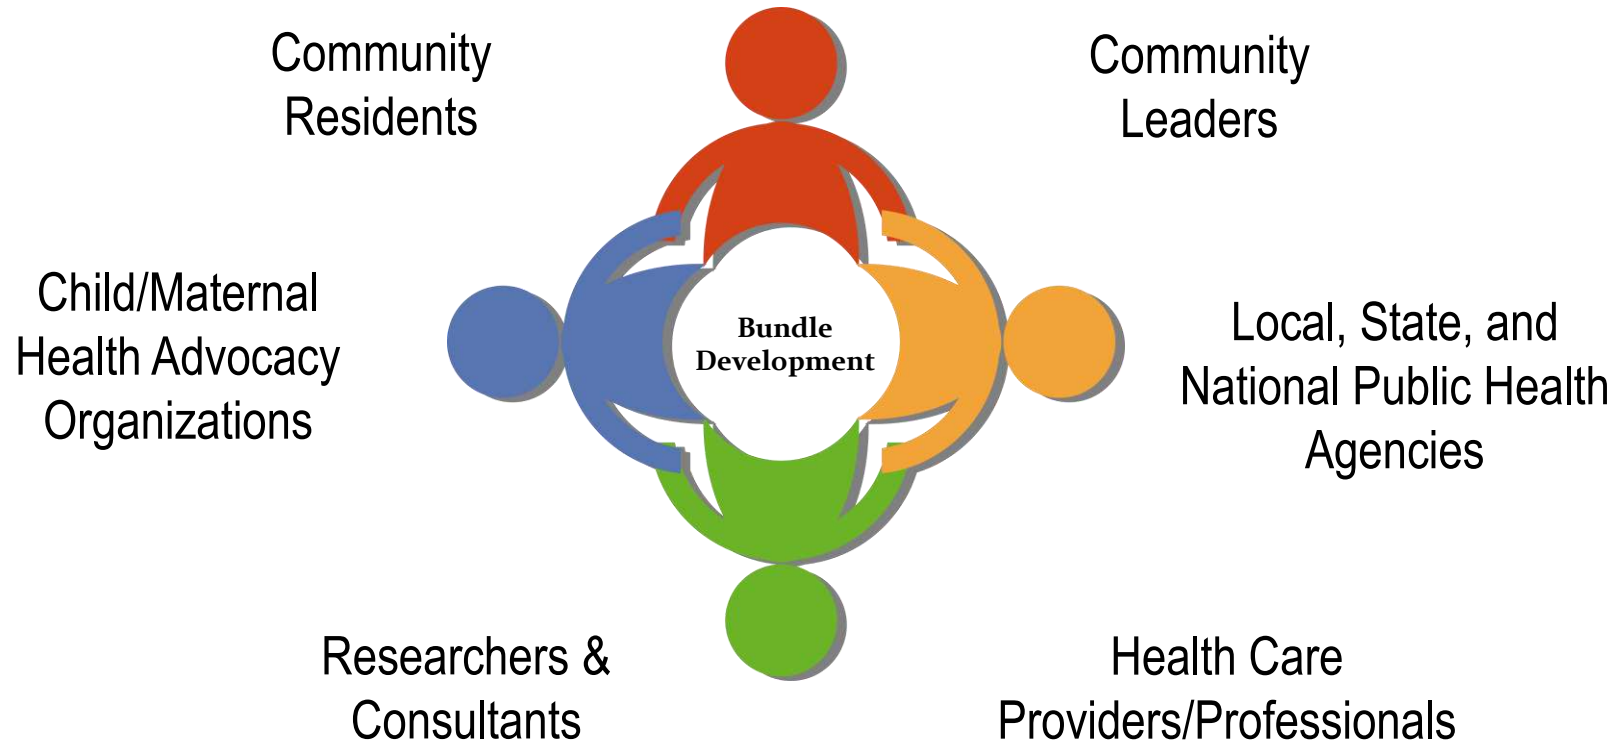

2. Shared Measurement

3. Mutually Reinforcing Activities

4. Continuous Communication

5. Backbone Support Organizations

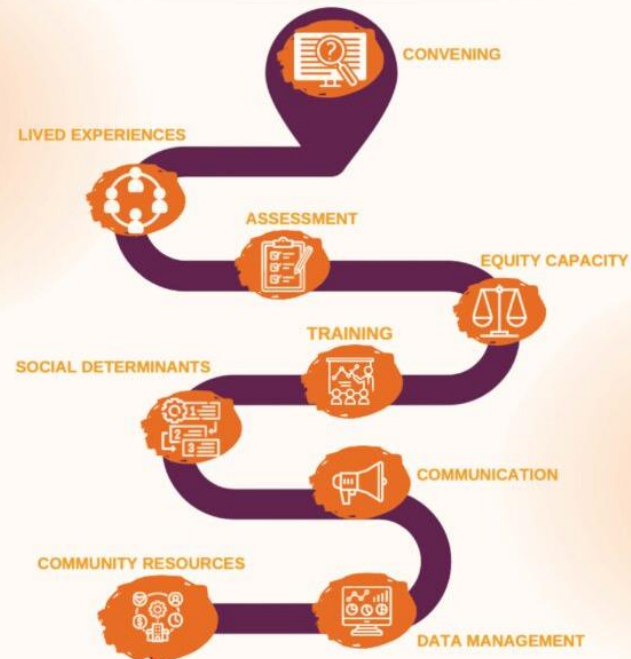

Bring the Community Together

Clinical – Community Integration

CLINICAL COMMUNITY INTEGRATION

An AIM CCI Guide to Establish a Collective Impact Model to Improve Maternal Health

Social Determinants - *key drivers of AIM CCI bundles*

- Foundational data element requires stratification of health outcomes to include SDOH and other identifiers
- Each bundle signals attention to SDOH
 - Chronic Conditions
 - Promote informed decision-making related to infant feeding, provide education and resources to support breastfeeding ...
 - Assess current community resources for nutritious food access
 - Screen for and identify risks for chronic or emerging medical conditions... inclusive of SDOH
 - Assess current screening tools to ensure they capture SDOH factors that impact chronic disease
 - Mental health
 - Establish a process for collecting and reporting on community level data on stress, trauma, anxiety and depression

CCI In Action

Review current partners

- Who are all the current organizations you work with
- Formal vs. informal relationships

Review current capabilities

- Data collection
- Community reach
- Ability to convene stakeholders
- Ability to engage and move project forward

Convene more partners for another overview with larger community

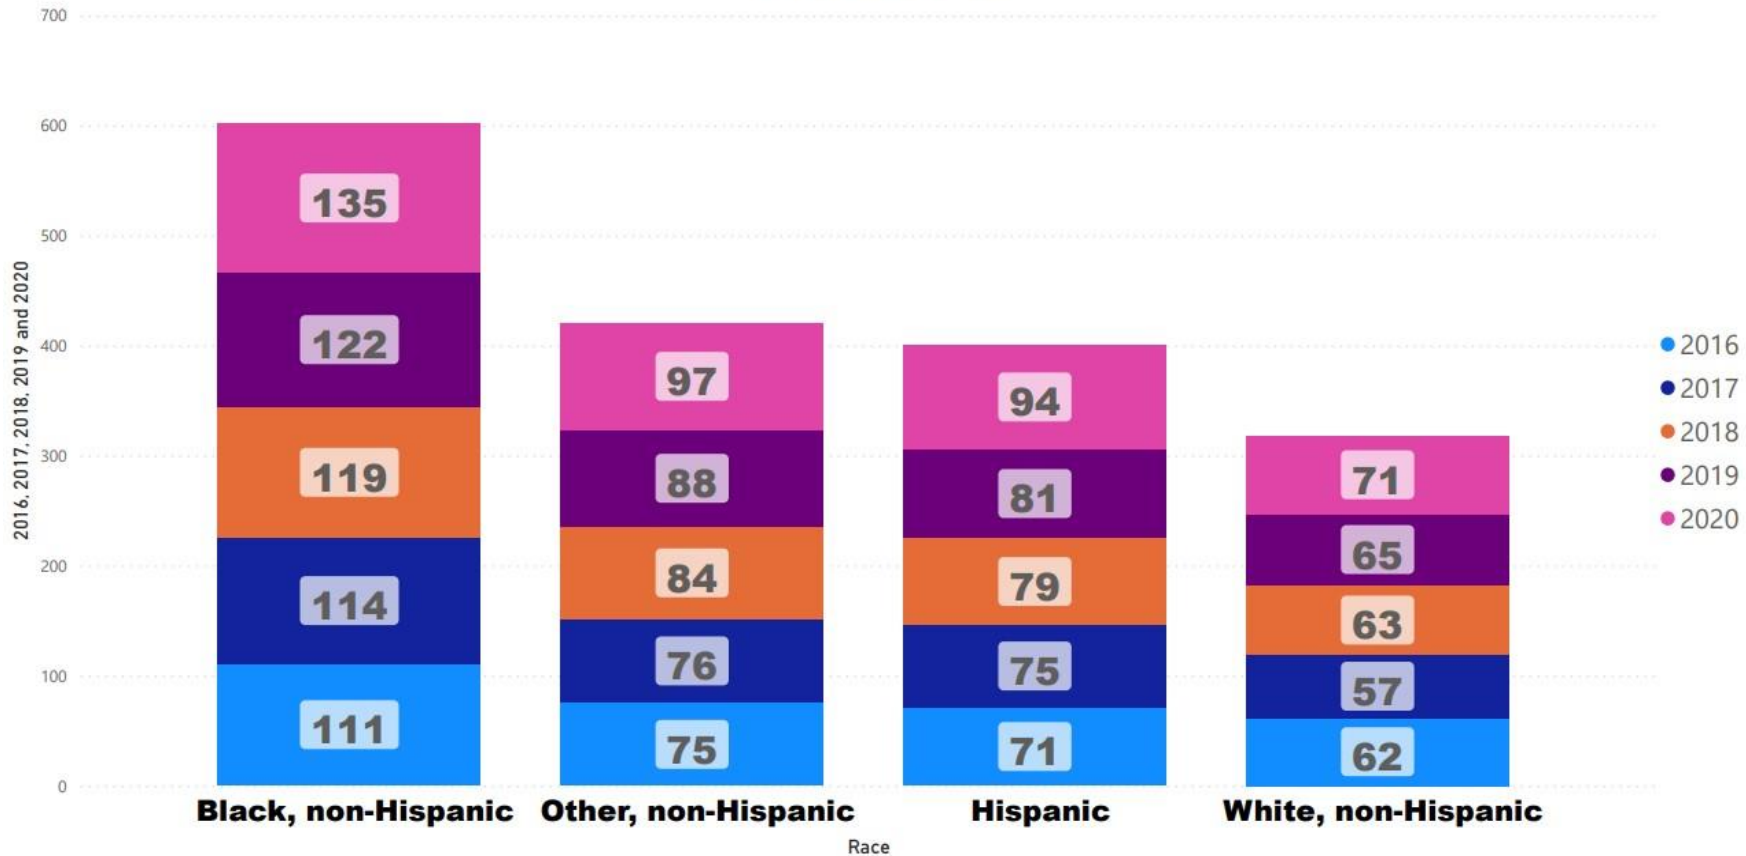

Inculcated in Equity

Why is Maternal Health Equity Important?

Severe maternal morbidity rate per 10,000 live births, by Race/Ethnicity
2016–2020

How does AIM CCI Inculcate Equity?

The **NHSA - AIM CCI Racial Equity Learning Series** is a seven-part module designed to enhance knowledge on Equity Capacity awareness and implementation using a multi-level approach (i.e., person, dept., organization) to anchor racial equity across systems.

Objective: Understanding the role of racism:

RELS will assist the individuals in your organization(s) or community workgroup(s) with understanding the role of racism, provide tools to reverse harmful norms and build new racial equity capacity.

FREE: No cost for you to complete any aspect of this Learning Series.

AIM CCI Bundles

Community Care for Postpartum Safety & Wellness Bundle

Postpartum Safety & Wellness Bundle

A non-hospital maternal safety bundle to create a system of care for women from birth through the first year postpartum.

ALLIANCE FOR INNOVATION ON MATERNAL HEALTH
Community Care Initiative (AIM CCI)

NATIONAL
HEALTHY START
ASSOCIATION

Bundles: *Designed for Community*

FOUNDATIONAL LEVEL ACTIONS

- ▶ *Stratify health outcomes data by race, ethnicity, social determinants of health, and other identifiers to guide actions to address root causes of inequities.*
- ▶ *Assess Local Maternal Safety Workgroups (LMSW) and lead organization's equity capacity using the Self-Assessed Measurement of Racial Equity Capacity (SAMREC).*
- ▶ *Provide on-going training and education to LMSW members on equity capacity and sustainability using NHSA AIM CCI Racial Equity Learning Series (RELS).*
- ▶ *Create and implement communication pathways between inpatient, outpatient, and community-based providers to facilitate/ensure continuity of care.*
- ▶ *Implement and maintain an up-to-date inventory of accessible community resources to assist with emergent and unmet medical, mental health, social and material needs by working collaboratively with community partners.*

FOUNDATIONAL RESOURCES

Foundational: [*foun-dey-shuh-nl*], adjective - of or relating to the basis or groundwork on which something rests or is built; needing to be understood or established at the beginning. AIM CCI foundational level actions are intended to be a core part of a community's approach to improve maternal health outcomes.

Title	Description	Resource Link
Clinical Community Integration Roadmap	Guide to create the framework for a perinatal system of care within our daily processes, organizational and community structures and culture to ensure that every woman, from pregnancy through the first year postpartum, receives equitable care that addresses her medical, behavioral health, and psychosocial needs	Click here 
AIM CCI Self-Assessed Measure of Racial Equity Capacity (SAMREC)	Assessment designed to identify stage of readiness to promote equity	Click here 
Racial Equity Learning Series (RELS)	Learning series to increase racial equity	Click here 

Bundles: *What's Next?*

- **Community Care for Maternal Mental Health & Wellness**
 - Stress, Anxiety, Depression
 - Testing phase
 - PDSA cycle ends in March
 - Quarterly Pilot Meeting
 - Feedback session
 - Publicly available early 2023
 - Resources
 - Learning Series

Bundles: *Under Development*

- **IPV**
 - Finalized Bundle Elements – September 2022
 - Launch PDSA testing in 2023
- **Managing Chronic Conditions**
 - Hypertension, Diabetes, Healthy Weight
 - Prenatal and postpartum period
 - Finalize Bundle Elements – November 2022
 - Launch PDSA testing in 2023

Resources for AIM CCI Implementation

WHAT ARE MATERNAL MONOLOGUES?

Maternal Monologues are community presentations of stories by women/birthing persons and their supporters along the journey of motherhood and maternal health. These stories are based on real experiences, and designed to serve as a tool for healing, raising awareness, joining in community, and mobilizing for change.

The way that each community presents their Maternal Monologues may look different from place to place. They can be in-person or virtual. You can be as creative as you'd like in your production. This toolkit is designed to provide a guide for getting started. However, there are some key elements that you will want to be sure to include:

MONOLOGUES: stories told from 1st person perspective (3-5 minutes each)

AWARENESS RAISING: provide some information on the state of maternal health in the United States and in your community

PLANNING FOR ACTION: engage the audience in a discussion on how they can organize and become involved in the work to advocate for supporting and protecting mothers/birthing persons and improving maternal health outcomes in your community

HOW CAN MATERNAL MONOLOGUES BE USED TO START COMMUNITY CONVERSATIONS?

- raises awareness about maternal health issues in our nation and communities
- creates a supportive space for community members to share stories of both joy and pain
- provides a creative outlet for engaging people in discussion about difficult topics
- brings a diversity of community members together to address a shared concern
- provides structure for holding discussion and planning for action

Martin County Healthy Start	Florida (rural and urban)
Urban Baby Beginnings	Virginia (urban)

AIM CCI Partner Sites

Becoming a Partner Site – *What's involved?*

As simple as 1, 2, 3 ...

#1 – The LMSW

Identify and convene a **local maternal safety workgroup** comprised of community-focused public health and clinical experts to guide program activities.

#2 Non-hospital Safety Bundles

Facilitate national implementation and **adoption of non-hospital focused maternal safety bundles** for use within outpatient clinical settings and community-based organizations; and,

#3 – Data

Collect and analyze structure, process, and outcome **data** to drive continuous improvement in the implementation of non-hospital focused maternal safety bundles, through a continuous quality improvement (QI) framework.
