- Divisions
- Healthy Start

# GAO Evaluation

- A) Factors that contribute to infant mortality, including poor birth outcomes (such as low birthweight and preterm birth) and social determinants of health.
- (B) Communities with-
  - (i) high rates of infant mortality or poor perinatal outcomes; or
  - (ii) high rates of infant mortality or poor perinatal outcomes in specific subpopulations within the community.
- (C) The extent to which applicants for such grants facilitate-
  - (i) collaboration with the local community in the development of the project;
  - (ii) a community-based approach to the delivery of services;
  - (iii) a comprehensive approach to women's health care to improve perinatal outcomes; and
  - (iv) the use and collection of data demonstrating the effectiveness of such program in decreasing infant mortality rates and improving perinatal outcomes...
  - **Other: addressing disparities**

# What is the Maternal and Infant Health Mapping Tool?

- Interactive online tool for exploring the geographic relationships between maternal and infant health indicators, health resources, and demographics
- Designed to help federal, state and local decision-makers and others visualize maternal and infant health factors to assist in understanding need and targeting resources

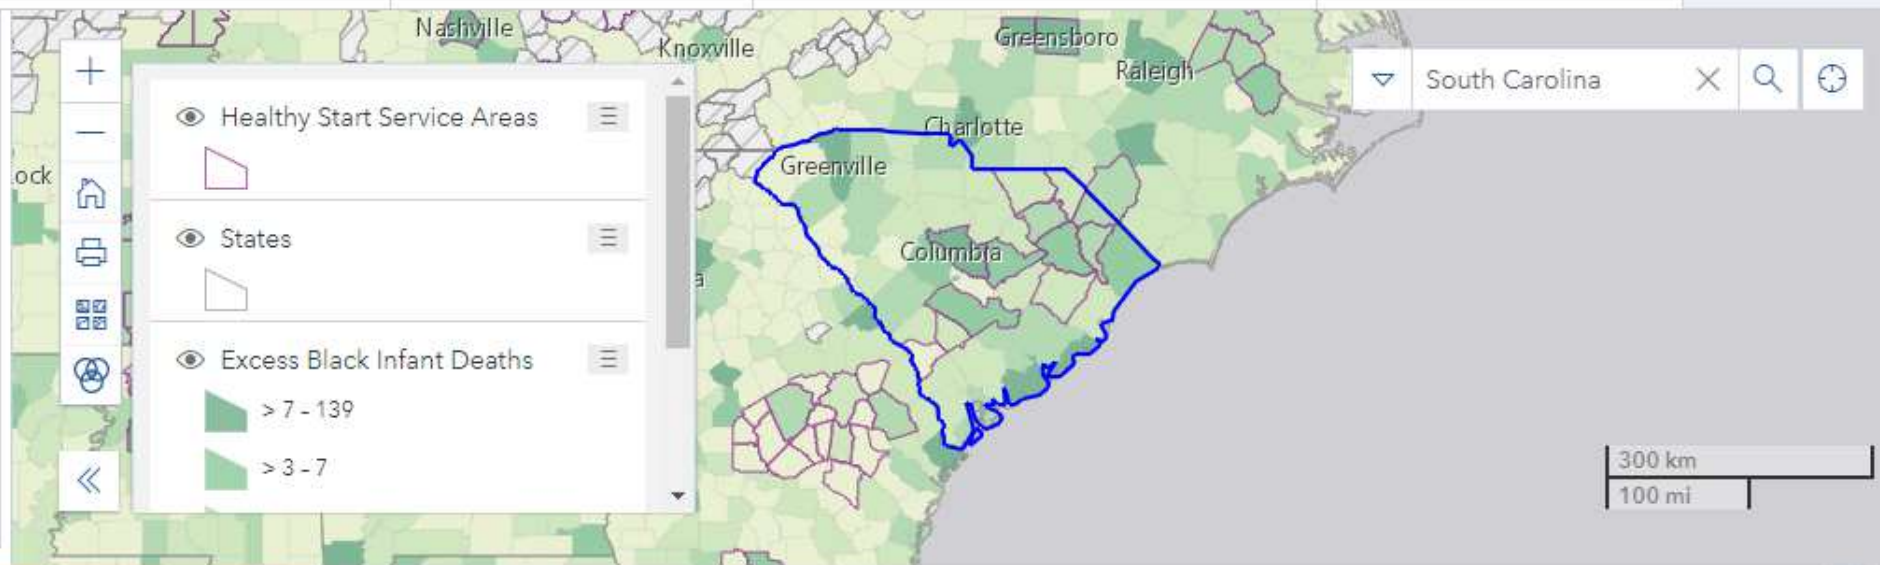

The screenshot displays the HRSA Maternal and Infant Health Mapping Tool interface. At the top, the HRSA logo is followed by the title "Maternal and Infant Health Mapping Tool" and the text "FOR INTERNAL USE ONLY". A "How to Use This Tool" link is visible in the top right corner. Below the title is a navigation bar with tabs for "All Layers", "Health Indicators", "Infant Health Equity", "Health Resources", "Demographic Characteristics", and "Geographic Areas". The "All Layers" tab is active, showing a list of layers: "Health Indicators", "Infant Health Equity", "Health Resources", "Demographic Characteristics", "Geographic Areas", and "Your Data" with an "Add Data" button. The main area features a map of the United States with various cities labeled, including Edmonton, Calgary, Vancouver, Seattle, San Francisco, Los Angeles, Denver, St. Louis, Chicago, Detroit, Toronto, Ottawa, Boston, Philadelphia, Washington, Dallas, Atlanta, Houston, Monterrey, Miami, and the Gulf of Mexico. A search bar with the placeholder "Enter a U.S. location" and a search icon is located in the top right of the map area. A scale bar at the bottom right indicates 1000 km and 600 mi. A vertical toolbar on the left side of the map contains icons for zooming in (+), zooming out (-), home, print, full screen, and a location pin.

# Key Accomplishments

## Staff

- Successfully working during COVID in a telework environment; maintaining high level of productivity, despite staff shortages, increase work, and deployments

## Grantees

- Continued to provide needed services to participants under extreme duress
- More than 90% of all HSMED reports submitted on time

## Data and Evaluation

- Data systems - HSMED, CAREWare for Healthy Start; retiring the aggregate data template.
- Various data projects (e.g., Service Areas\excess death compilation, mapping projects, DGIS revisions).
- Creation of new guidance documents (e.g., benchmark data dictionary).
- Grantee and PO Trainings on the data systems.
- Implementation of evaluation contract

# Key Accomplishments

---

- Mentoring program; completed a full cycle with the first cohort
- SACIM virtual meetings in January, April, September, and December of this year. Recommendations sent to Secretary

## Programmatic

- NOFOs released - IHE, doula, TA center.
- Launching of successful virtual site visits

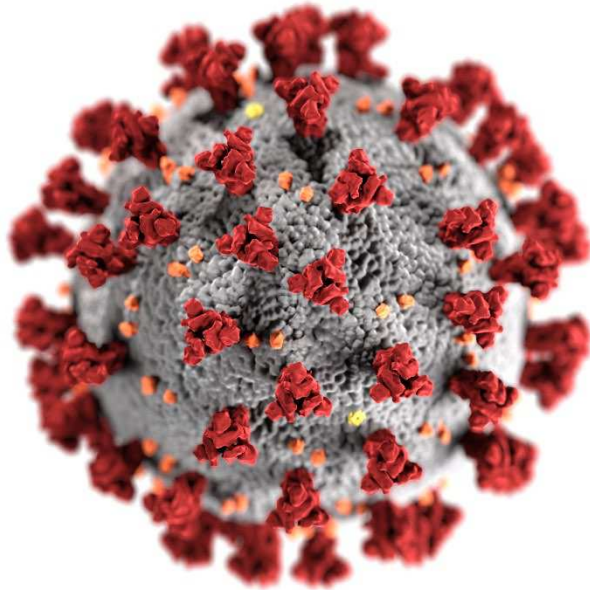

# Budget Considerations and Priorities for FY22

## Reaffirming Our Commitment

Program	FY2021 Enacted (in millions)	FY2022 President's Budget (in millions)	FY22 House and Senate (in millions)
Healthy Start	\$128.0	\$128	+17/+9

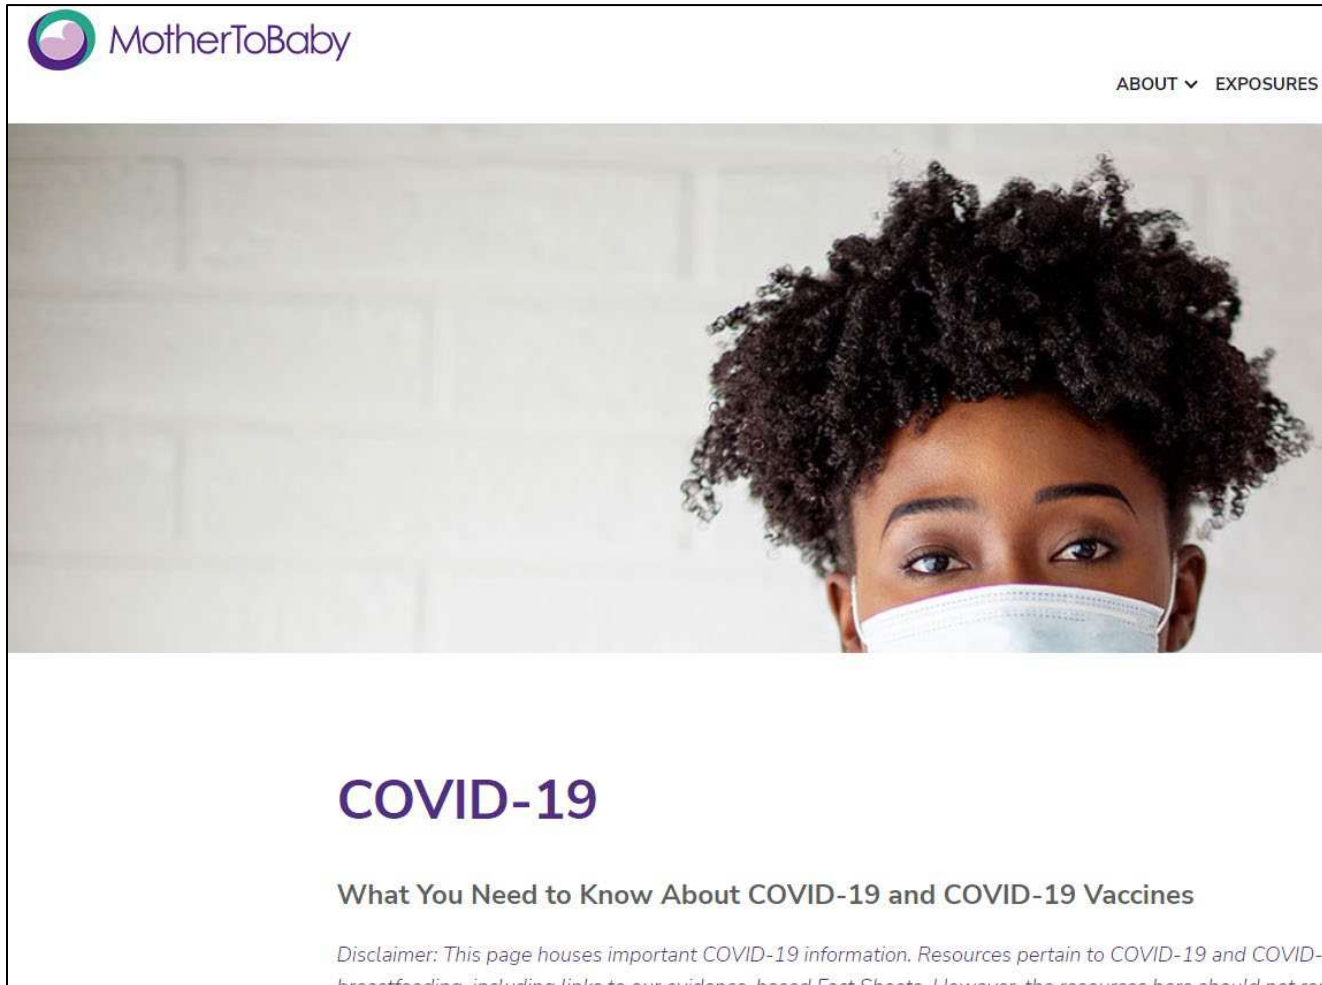

# Vaccination: CDC Guidance

- Vaccination is our key to getting back to “normal”
- In August, the CDC [updated their guidance](#) to recommend COVID-19 vaccination for all people 12 years and older, including people who are pregnant, recently pregnant (including those who are lactating), trying to get pregnant now, or might become pregnant in the future

# MCHB-Funded Resource: MotherToBaby

- Call, text, chat or email with questions
- 866-626-6847
- [mothertobaby.org](https://mothertobaby.org)

# COVID Vaccines Hesitancy: What can you do?

- COVID-19 vaccine hesitancy is multifaceted. The perceived threat of COVID-19, level of trust in public health agencies, and existing pre-COVID 19 vaccine attitudes play key roles shaping vaccine acceptance and confidence. Vaccination campaigns should be tailored to alleviate these specific concerns.
- Educate providers and encourage providers to advocate vaccinations for pregnant and women of childbearing age
- Utilize Community-based interventions (cultural competence), incentives, and technology-based health literacy for PSAs.
- Create a more positive client experience to make access to the vaccine easy and seamless, for example, have case managers offer to escort the client to their appointment, and follow up through texts and or calls following administering the vaccine.
